1. Introduction

1.1 Background

1.1.1 The Environment Partnership (TEP) was commissioned through WSP by Cadent Gas Limited (Cadent) in 2022 to undertake hedgerow assessment surveys along the HyNet North West Hydrogen Pipeline (hereafter referred to as 'the Project'). Cadent (the Applicant) is applying to the Secretary of State for a Development Consent Order (DCO) to construct, operate, and maintain a new underground hydrogen pipeline approximately 100km in length.

1.1.2 The Project within the Preliminary Order Limits can be split into five distinct areas, comprising four pipeline Corridor routes and the Central Hub, an area where the four Corridor routes meet which cannot be associated with any specific route. . Please note that as part of the design process, the order limits have undergone a number of iterations (as described in **Appendix 2A: Design evolution** of the Draft ES) and this report is based on the Preliminary Order Limits as considered in the Preliminary Environmental Information Report (PEIR) published in September 2022.

1.1.3 This report details the results of hedgerow assessments conducted in 2023 to inform the assessment for the Project.

1.2 Legislation

1.2.1 The Hedgerows Regulations (1997) make provision for the protection of important hedgerows within England and Wales. The regulations apply to hedgerows which are 20m or more in length, or connected at both ends to another hedgerow of any length and are more than 30 years old. They relate to hedgerows which are on, or adjoining land used for the following purposes: agriculture or forestry; the breeding or keeping of horses, ponies, or donkeys; common land; village greens; and SSSIs. The regulations do not apply to hedgerows that do not meet the above set out criteria or if they are attached to mark the boundary of a dwelling house. It is an offence to intentionally or recklessly remove or cause or permit another person to remove a hedgerow which is the subject of a hedgerow retention notice.

1.2.2 The Hedgerows Regulations 1991 provide a series of comprehensive assessments to identify 'Important' hedgerows. To qualify as 'Important' under the regulations, the hedgerow must comply with the afore mentioned mandatory criteria as well as must meet one or more of several criteria in relation to archaeology and history and/or wildlife and landscape.

2. Methodology

2.1 Desk Study

2.1.1 A desk study was undertaken in Spring 2022 and the methodology for this is set out in Section 5.5 and Table 5.8 of the Preliminary Environmental Information Report (PEIR). The desk study recorded the presence of statutory designated sites within up to 20km[1] of the Preliminary Order Limits (Section 5.6.1, Table 5.10, and Figure 5.1 of the PEIR) and non-statutory designated sites within 2km (Section 5.6.2, Table 5.11, and Figure 5.2 of the PEIR). The desk study also recorded the presence of Habitats of Principal Importance (HPI) within 2km of the Preliminary Order Limits (section 5.6.3., Table 5.12 and Figure 5.3 of the PEIR). Records of protected and notable species within 2km of the Preliminary Order Limits are discussed within section 5.6.12-5.6.41 of the PEIR.

2.1.2 The desk study information from the PEIR is not repeated in this report or discussed further. The desk study will be updated for the Final Environmental Statement following design freeze for the Project.

2.2 Survey Area

Defining survey scope

2.2.1 In line with CIEEM guidance[2], surveys were focussed on those areas in which works associated with the Project could result in contravention of the legislation protecting hedgerows.

2.2.2 The Project covers six local planning authority (LPA) boundaries: Cheshire West and Chester, Cheshire East, Halton, St Helens, Warrington and Trafford. The Project is divided into the following four Corridors, which meet at the Central Hub near Bartington, northwest of Northwich in Cheshire:

- **Line 1 West Corridor - Stanlow HPP Hydrogen Above Ground Installation (HAGI) to Central Hub HAGI** (hereafter referred to as the 'Western Corridor'): The Western Corridor runs from Elton, Cheshire heading northeast to Frodsham before turning east, crossing the M56 motorway and towards Bartington;
- **Line 2 South Corridor - Central Hub HAGI to Inovyn HSF HAGI** (hereafter referred to as the 'Southern Corridor'): The Southern Corridor runs from east of Bostock Green, Middlewich heading west and then north around Moulton before heading west again across the River Weaver and then north across the A556 and A49 towards Bartington;

[1] Dependent on reasons for designation; within 2km for habitats, extending to 10km for bats, and up to 20km for ornithological interest for international sites.

[2] Chartered Institute of Ecology and Environmental Management (CIEEM) (2019). Guidelines for Ecological Impact Assessment in the United Kingdom. CIEEM, Winchester.

- **Line 3 East Corridor - Central Hub HAGI to Partington HAGI** (hereafter referred to as the 'Eastern Corridor'): The Eastern Corridor runs from Carrington, Trafford heading south to the M56 motorway before heading southwest and across the M6 motorway towards Bartington; and
- **Line 4 North Corridor - Central Hub HAGI to Clock Face HAGI** (hereafter referred to as the 'Northern Corridor'): The Northern Corridor runs from St Helens heading south to the M62 motorway before turning southeast towards the Manchester Ship Canal and then south again and across the M56 motorway towards Bartington.

2.2.3 The survey area is predominately farmland with scattered woodland, hedge and tree lined field boundaries and watercourses. There are some active industrial / commercial areas and some inactive post-industrial areas, golf courses and a few limited residential areas.

2.2.4 In spring 2023, WSP undertook a review of habitat data available at the time to identify a number of hedgerows potentially requiring hedgerow assessments. The hedges were selected on the basis of existing data (information recorded during the UKHab[3] surveys where available) indicating they could be Important, existing data being insufficient to rule out Importance or hedgerows where access had previously been denied. The scope included consideration of all hedgerows within the Preliminary Order Limits (POL), which were subject to updates during the survey period and therefore some hedgerows were subject to survey which are now no longer anticipated to be affected by the Proposed Scheme.

2.3 Field Surveys

Approach to field survey design

Overview

2.3.1 To determine if any hedgerows that would potentially be lost to the development qualify as “important” on ecological criteria, further surveys (in addition to UKHab surveys) following the Hedgerows Regulations 1997 method were undertaken.

2.3.2 Where access was not possible during WSP UKHab surveys, the location of hedgerows / potential hedgerows were identified from aerial imagery. TEP conducted hedgerow assessments of these features, some hedgerows were scoped out from further assessment if age, limited woody species and lack of associated features were noted at the start of the assessment.

2.3.3 Hedgerows were given number IDs during the scoping exercise. It was necessary to split some hedgerows into smaller sections once in the field, in line with the assessment method. Each hedgerow section has a unique ID. Split hedgerows were assigned suffix letters to their original hedge IDs.

[3] WSP (2023) Preliminary Ecological Appraisal Report HyNet North West Hydrogen Pipeline.

2.3.4 A total of 608 hedgerow sections were identified of which 442 were scoped out, two were not accessed and 164 hedgerows were fully assessed as part of these surveys (of which three of these hedgerows are now located outside of the POL and two hedgerows no longer found present).

Hedgerow assessment survey method

2.3.5 The hedgerow assessments conducted as described within this report, only assess hedgerows against the wildlife and landscape criteria (criteria 6-8); archaeology and history criteria (criteria 1-5) as set out in the Hedgerow Regulations 1997 have not been considered within this report.

2.3.6 Native hedgerows were subject to a detailed sampling survey in accordance with the criteria set out in the Hedgerow Regulations (1997) in terms of wildlife and landscape criteria for determining "important" hedgerows. This entailed recording the number of woody species (as listed on Schedule 3 of the Hedgerows Regulations 1997) within 30m sample sections[4] as well as any features within 2m associated with the hedge. These features include the presence of any bank or wall, ditch, standard trees and ground flora species (as listed on Schedule 2 of the Hedgerows Regulations 1997). Also, the number of connections with adjacent hedgerows was recorded. Hedgerow target notes were made on standard data recording forms. For each hedgerow this included a description of the hedge and detailed plant species list.

2.3.7 For the purposes of this assessment a hedgerow is defined as a boundary line of native shrubs or a mix of native shrubs and trees over 20m long and less than 5m wide, and where any gaps between the trees or shrub species are less than 20m wide. Any bank, wall, ditch or tree within 2m of the centre of the hedgerow is considered to be part of the hedgerow habitat, as is the herbaceous vegetation within 2m of the centre of the hedgerow. Only hedgerows consisting predominantly (80% or more cover) of at least one woody UK native species (listed on Schedule 3 of the Hedgerows Regulations 1997) are considered to be native and covered by this assessment.

2.3.8 The above definition of a hedgerow is largely based on the UK Biodiversity Action Plan (UKBAP) definition of a hedgerow but it also takes into account details from the Hedgerow Regulations 1997 and Handbook for Phase 1 Habitat survey (JNCC 2010) in order to ensure all hedgerow features considered native are assessed.

2.3.9 Further factors which are considered during this assessment include the proximity of public by-ways and footpaths, parallel hedgerows, semi-natural woodland and ponds. The presence of these features adjacent to a hedgerow increases the likelihood that it could qualify as "important".

[4] The length of the hedge determines the number of samples required. For hedgerows 30m-100m in length, species in the central 30m were recorded. For hedgerows 100m-200m, species in the central 30m of each half of the hedge were recorded. For hedgerows >200m species in the central 30m of each third of the hedge were recorded.

2.3.10 In addition, where identified during the hedgerow survey, presence of or field signs of any legally protected species or species which are listed on Section 41 of the NERC Act 2006 or are included in the Local BAP were mapped and noted. This includes species which form part of Schedule 1, 5 & 8 of the Wildlife and Countryside Act (WCA), as amended (1981). This is largely limited to the presence of native bluebell, no reference to protected species identified in any other surveys nor in data searches has been included in this assessment.

2.3.11 Criteria 6 passes hedgerows as "important" due to the presence of species listed under the Wildlife and Countryside Act 1981. For the purposes of this assessment, this only includes plant which are protected (Schedule 8) including native bluebell Hyacinthoides non-scripta.

2.3.12 Criteria 7 passes hedgerows as "important" due to the presence of at least 7 woody species within it; 6 woody species and 3 features outlined below; or 5 woody species and at least 4 features as outlined below.

2.3.13 The associated features referred to above are:

- a bank or wall which supports the hedgerow along at least one half of its length;
- gaps which in aggregate do not exceed 10% of the length of the hedgerow;
- where the length of the hedgerow does not exceed 50 metres, at least one standard tree;
- where the length of the hedgerow exceeds 50 metres but does not exceed 100 metres, at least 2 standard trees;
- where the length of the hedgerow exceeds 100 metres, such number of standard trees (within any part of its length) as would when averaged over its total length amount to at least one for each 50 metres;
- at least 3 woodland species within one metre, in any direction, of the outermost edges of the hedgerow;
- a ditch along at least one half of the length of the hedgerow;
- connections scoring 4 points or more; or
- a parallel hedge within 15 metres of the hedgerow.

2.3.14 Criteria 8 passes the hedgerow as "important" when the hedgerow is adjacent to an official bridleway or footpath, includes at least 4 woody species and passes at least of 2 of the above features.

2.3.15 A link to wildlife and landscape criteria for determining "important" hedgerows under the Hedgerow Regulations 1997 is given below: The Hedgerows Regulations 1997 (legislation.gov.uk).

2.3.16 The hedgerow assessment surveys were undertaken in April, May and June 2023.

2.4 Constraints

Access limitations

2.4.1 Access was granted to most hedgerows identified as requiring further survey, with the exception of two hedgerows along the Southern Corridor (1200_86 and 1200_85).

2.4.2 Some hedgerows were assessed outside of the optimum period of April and May due to access constraints; all of these hedgerows were surveyed in the first week of June with exception of Hedgerow_1300_01 along the Western Corridor which was surveyed on 22nd June. The full list of hedgerows surveyed in June comprise:

- Southern Corridor Hedgerows_ 1200_55, 57, 63 and 107;
- Western Corridor Hedgerows_1300_01, 71, 76, 77, and 78; and
- Northern Corridor Hedgerows_1400_33, 34, 36, 46, 47, 48, 49, 51, 52, 77, 80, 99, 100, 101, 104,106 and 128.

2.4.3 This is not however seen as a limitation to the surveys as UKHab survey as well as desktop study had identified protected species, such as bluebells, previously and features/species would have still been largely identifiable in June.

Ecological considerations

2.4.4 All hedgerow survey visits, other than those outlined above due to access limitations, were undertaken during fair weather conditions and within the appropriate survey season for assessing.

2.4.5 While protected plant species have been taken into consideration to form part of this assessment, protected fauna has not. Protected species that could be utilising the hedgerow, including birds, great crested newts and badgers for example, have not formed part of this assessment.

2.5 Personnel

2.5.1 The programme of surveys was led by an experienced Botanist with BSBI's Field Identification Skills Certificate (FISC) Level 5, with 16 years' experience working in consultancy.

2.5.2 The survey lead was assisted by suitably qualified and experienced ecologists with either FISC level 4 certification or demonstrable experience in botanical and hedgerow surveys.

3. Results

3.1 Field Survey

3.1.1 A summary of the hedgerow assessment is provided in the paragraphs below, detailed survey data and assessment against The Hedgerows Regulations 1997 is provided in Appendices B through to F. A summary of the findings are illustrated in **Figure 5D.1** Hedgerow Survey Locations within **Appendix A** and set out in **Table 3.1**. below.

3.1.2 Hedgerows were listed as "Important" due to having sufficient species diversity and associated features to qualify under The Hedgerows Regulations 1997 in terms of the wildlife and landscape criteria.

3.1.3 Due to changes in the POL of the Proposed Scheme, three hedgerows were scoped in for survey that are now no longer within the POL. These were all associated with the Tata Spur and comprised two hedgerows assessed as being "Not Important" (1210_41 and 1210_46B) and one hedgerow assessed as being "Important" (1210_43). These hedgerows are shown on **Figure 5D.1** for completeness and full details of the assessment provided in **Appendix F**, however **Table 3.1** focuses on hedgerows located within the POL.

Table 3.1 Hedgerow Assessment Summary of hedgerows within POL

No. of hedgerows	Northern Corridor	Eastern Corridor	Southern Corridor	Tata Spur	Western Corridor	Total
Important (Criteria 7 or 8)	5 (1400_16B, 1400_22B, 1400_36, 1400_51A, 1400_57)	4 (1300_110c* 1300_121, 1300_143, 1300_145,)	7 (1200_18A, 1200_18B, 1200_24, 1200_33, 1200_63, 1200_70, 1200_84B)	0	0	16
Important (Criteria 6 only)	0	2 (1300_110B, 1300_118B,)	1 (1200_47)	1 (1210_46C)	0	4
Not important	47	43	25	7	17	139
Total	52	49	33	8	17	159**

*Also qualifies under Criteria 6
**Additional hedgerows were assessed but fall outside the current POL.

3.1.4 In addition to the hedgerows listed in the above Table, hedgerow 1200_41 was no longer present and hedgerow 1300_01 was not a hedgerow. All others were scoped out of requiring full assessment.

3.1.5 All native hedgerows qualify as S41 and LBAP and information on these is provided with the UKHab survey report[5].

[5] WSP (2023) Preliminary Ecological Appraisal Report HyNet North West Hydrogen Pipeline.

4. Summary

4.1 Overview

4.1.1 A total of 20 hedgerows were identified within the POL as Important under the Hedgerow Regulations 1997. Of this, 16no. hedgerows were identified as Important under Criteria 7 or 8, with most situated along the Southern Corridor (seven). Important hedgerows were also present on the Northern and Eastern Corridors (five and four respectively), and none were identified on the Western Corridor.

4.1.2 A further four hedgerows were identified as Important under Criteria 6 of the Hedgerow Regulations 1997 due to presence of native bluebell, of which two were on the Eastern Corridor, one was on the Southern Corridor, and one on the Tata Spur. None were identified on the Northern or Western Corridors.

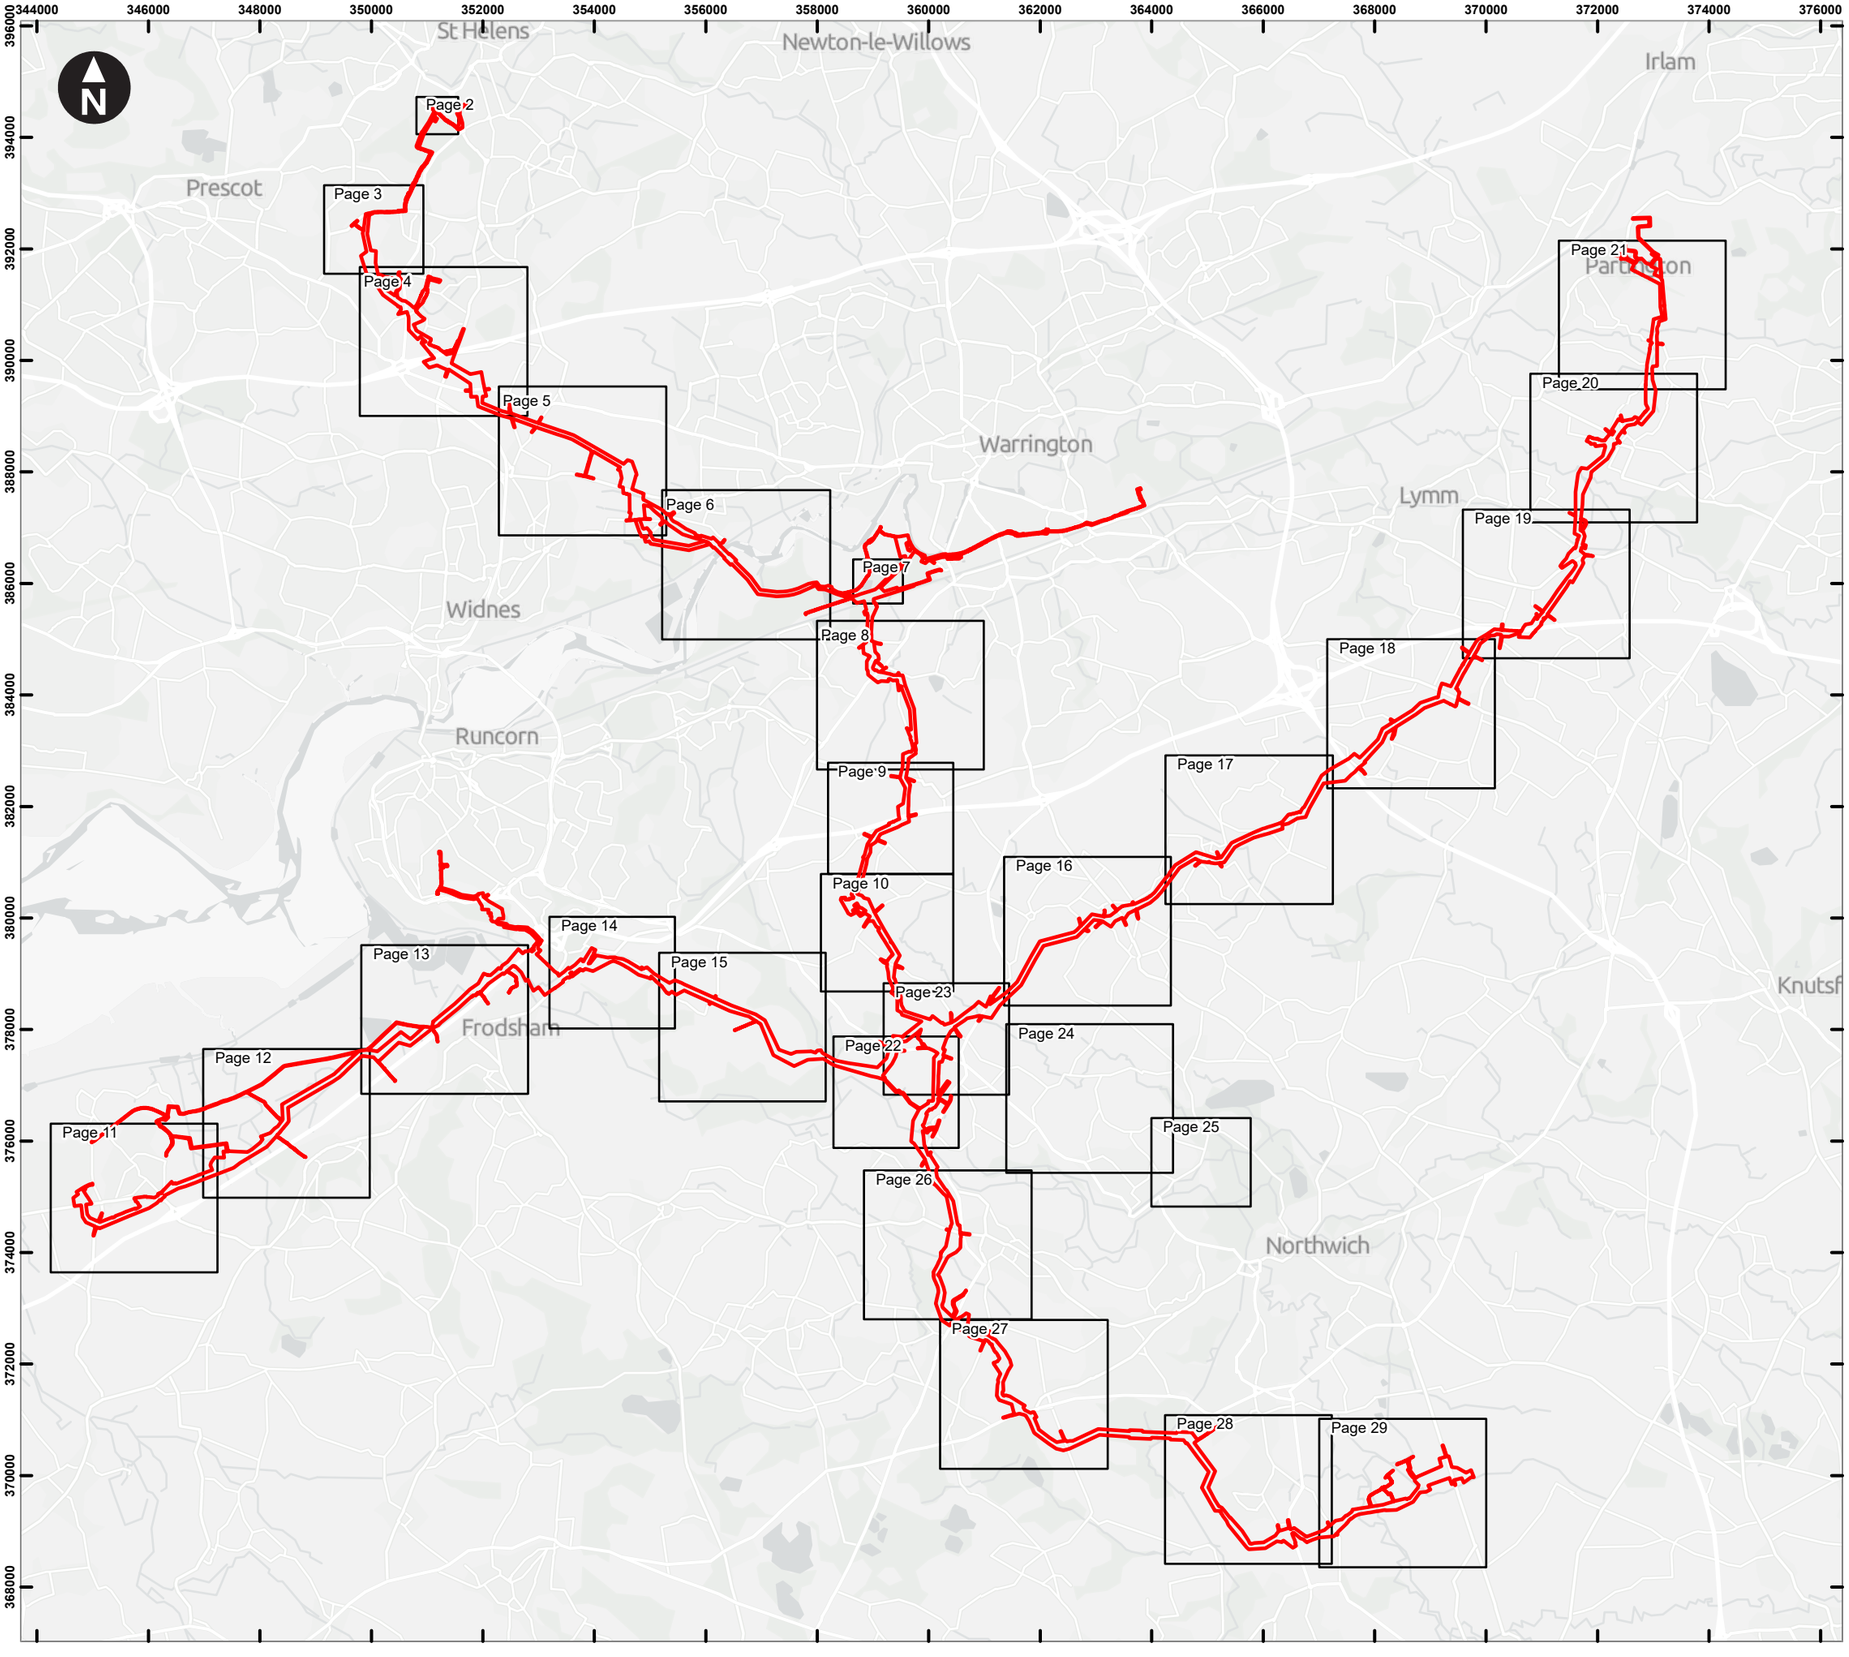

4.1.3 One additional hedgerow was identified as being Important along the Tata Spur, however this hedgerow is located outside of the current POL.

4.1.4 All native hedgerows qualify as S41 and LBAP and information on these is provided with the UKHab survey report.

HyNet North West Hydrogen Pipeline

Delivering clean growth

Annex 5D 2 Western Corridor Detailed Survey Results

1100 Hedgerow 01 – Not Important

Length (m)	170	No photo available due to equipment failure
Width (m)	1.5	
Height (m)	1.5	
Over 30 years old?	Y	
Form curtilage of private garden?	N	
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N	
Wall/bank along at least half its length	N	
Average of at least one standard tree per 50m	Y	
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N	
Ditch along at least half of the hedgerow	Y	
Parallel hedge within 15m of the hedgerow	Y	
Less than 10% gaps within hedgerow length?	Y	
Connections (within 10m) with another hedgerow	1	
Connections (within 10m) with a pond	0	
Connections (within 10m) with broadleaved woodland	0	
4+ connection points?	N	

1100 Hedgerow 01 – Not Important

Total Score	4
Average number of species	3
Botanical Samples List	
Sample 1 **Ash (Fraxinus excelsior); Hawthorn (Crataegus monogyna); Elder (Sambucus nigra); Willow (Salix species)**	
Sample 2 **Ash (Fraxinus excelsior); Hawthorn (Crataegus monogyna)**	
Sample 3 **Null**	
Comments: Hedgerow between arable potato crop and lane. Ditch along length with ferns (inaccessible to ID), though ground flora inclusion would not make hedge meet criteria for 'important'. <5 spp and insufficient features, no bridleway.	

1100 Hedgerow 12A - Not Important

Length (m)	113
Width (m)	2
Height (m)	2.5
Over 30 years old?	Y
Form curtilage of private garden?	N
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N
Wall/bank along at least half its length	N
Average of at least one standard tree per 50m	Y
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	Null
Ditch along at least half of the hedgerow	Y
Parallel hedge within 15m of the hedgerow	N
Less than 10% gaps within hedgerow length?	Y
Connections (within 10m) with another hedgerow	1
Connections (within 10m) with a pond	0
Connections (within 10m) with broadleaved woodland	0

1100 Hedgerow 12A - Not Important

4+ connection points?	N
Total Score	3
Average number of species	5
Botanical Samples List	
Sample 1 **Hawthorn (Crataegus monogyna); Elder (Sambucus nigra); Oak, pedunculate (Quercus robur); Hornbeam (Carpinus betulus); Rose (Rosa species)**	
Sample 2 **Hawthorn (Crataegus monogyna); Oak, pedunculate (Quercus robur); Hornbeam (Carpinus betulus); Blackthorn (Prunus spinosa); Elder (Sambucus nigra)**	
Comments: Field boundary hedge to pasture. Standing deadwood suitable for roosting bats and some sub-optimal water vole suitability in ditch. 5 spp and insufficient features, no bridleway.	

1100 Hedgerow 13 - Not Important

Length (m)	158	No Photo available due to equipment failure
Width (m)	1.5	
Height (m)	2.5	
Over 30 years old?	Y	
Form curtilage of private garden?	N	
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N	
Wall/bank along at least half its length	N	
Average of at least one standard tree per 50m	Y	
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N	
Ditch along at least half of the hedgerow	Y	
Parallel hedge within 15m of the hedgerow	N	
Less than 10% gaps within hedgerow length?	Y	
Connections (within 10m) with another hedgerow	3	
Connections (within 10m) with a pond	0	
Connections (within 10m) with broadleaved woodland	0	
4+ connection points?	N	

1100 Hedgerow 13 - Not Important

Total Score	3
Average number of species	3.5
Botanical Samples List **Herb-Robert (Geranium robertianum)**	
Sample 1 **Hawthorn (Crataegus monogyna); Blackthorn (Prunus spinosa)**	
Sample 2 **Oak, pedunculate (Quercus robur); Gorse (Ulex europaeus); Hawthorn (Crataegus monogyna); Elder (Sambucus nigra); Rose (Rosa species)**	
Comments: Boundary hedge to pasture/silage field, with very shallow ditch. <5 spp and insufficient features, no bridleway.	

1100 Hedgerow 14 - Not Important

Length (m)	236
Width (m)	2
Height (m)	2.5
Over 30 years old?	Y
Form curtilage of private garden?	N
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N
Wall/bank along at least half its length	N
Average of at least one standard tree per 50m	N
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N
Ditch along at least half of the hedgerow	N
Parallel hedge within 15m of the hedgerow	N
Less than 10% gaps within hedgerow length?	N
Connections (within 10m) with another hedgerow	2
Connections (within 10m) with a pond	0
Connections (within 10m) with broadleaved woodland	0
4+ connection points?	N

1100 Hedgerow 14 - Not Important

Total Score	0
Average number of species	4
Botanical Samples List	
Sample 1 **Hawthorn (Crataegus monogyna); Oak, pedunculate (Quercus robur); Blackthorn (Prunus spinosa); Hornbeam (Carpinus betulus)**	
Sample 2 **Hawthorn (Crataegus monogyna); Blackthorn (Prunus spinosa); Rose (Rosa species); Elder (Sambucus nigra)**	
Sample 3 **Hawthorn (Crataegus monogyna); Oak, pedunculate (Quercus robur); Gorse (Ulex europaeus); Elder (Sambucus nigra)**	
Comments: Very gappy hedgerow boundary to pasture field. Small shallow ditch to third of length (low, stagnant water). Two standing deadwood trees, suitable for bats. <5 spp and insufficient features, no bridleway.	

1100 Hedgerow 14C - Not Important

Length (m)	97
Width (m)	2
Height (m)	2
Over 30 years old?	Y
Form curtilage of private garden?	N
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N
Wall/bank along at least half its length	N
Average of at least one standard tree per 50m	Y
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N
Ditch along at least half of the hedgerow	N
Parallel hedge within 15m of the hedgerow	N
Less than 10% gaps within hedgerow length?	N
Connections (within 10m) with another hedgerow	4
Connections (within 10m) with a pond	0
Connections (within 10m) with broadleaved woodland	0
4+ connection points?	Y

1100 Hedgerow 14C - Not Important

Total Score	2
Average number of species	4
Botanical Samples List	
Sample 1 **Oak, pedunculate (Quercus robur); Hawthorn (Crataegus monogyna); Elder (Sambucus nigra); Gorse (Ulex europaeus)**	
Comments: Gappy pasture field boundary hedge. <5 spp and insufficient features, no bridleway.	

1100 Hedgerow 18C - Not Important

Length (m)	79
Width (m)	2
Height (m)	3
Over 30 years old?	Y
Form curtilage of private garden?	N
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N
Wall/bank along at least half its length	N
Average of at least one standard tree per 50m	Y
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N
Ditch along at least half of the hedgerow	N
Parallel hedge within 15m of the hedgerow	N
Less than 10% gaps within hedgerow length?	Y
Connections (within 10m) with another hedgerow	2
Connections (within 10m) with a pond	0
Connections (within 10m) with broadleaved woodland	0
4+ connection points?	N

1100 Hedgerow 18C - Not Important

Total Score	2
Average number of species	2
Botanical Samples List	
Sample 1 **Hawthorn (Crataegus monogyna); Elder (Sambucus nigra)**	
Comments: Boundary hedge, separating pasture field from busy A road. <5 spp and insufficient features, no bridleway.	

1100 Hedgerow 18A - Not Important

Length (m)	378
Width (m)	1.5
Height (m)	2.5
Over 30 years old?	Y
Form curtilage of private garden?	N
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N
Wall/bank along at least half its length	N
Average of at least one standard tree per 50m	Y
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N
Ditch along at least half of the hedgerow	N
Parallel hedge within 15m of the hedgerow	N
Less than 10% gaps within hedgerow length?	Y
Connections (within 10m) with another hedgerow	2
Connections (within 10m) with a pond	0
Connections (within 10m) with broadleaved woodland	0
4+ connection points?	N

1100 Hedgerow 18A - Not Important

Total Score	2
Average number of species	2
Botanical Samples List **Herb-Robert (Geranium robertianum)**	
Sample 1 **Hawthorn (Crataegus monogyna); Oak, pedunculate (Quercus robur); Elder (Sambucus nigra)**	
Sample 2 **Hawthorn (Crataegus monogyna); Oak, pedunculate (Quercus robur)**	
Sample 3 **Hawthorn (Crataegus monogyna)**	
Comments: Hedge margin to arable crop field. Recently ploughed up to hedge base. <5 spp and insufficient features, no bridleway.	

1400 Hedgerow 18B - Not Important

Length (m)	287
Width (m)	1.5
Height (m)	2
Over 30 years old?	Y
Form curtilage of private garden?	N
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N
Wall/bank along at least half its length	N
Average of at least one standard tree per 50m	N
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N
Ditch along at least half of the hedgerow	N
Parallel hedge within 15m of the hedgerow	N
Less than 10% gaps within hedgerow length?	Y
Connections (within 10m) with another hedgerow	5
Connections (within 10m) with a pond	0
Connections (within 10m) with broadleaved woodland	0
4+ connection points?	Y

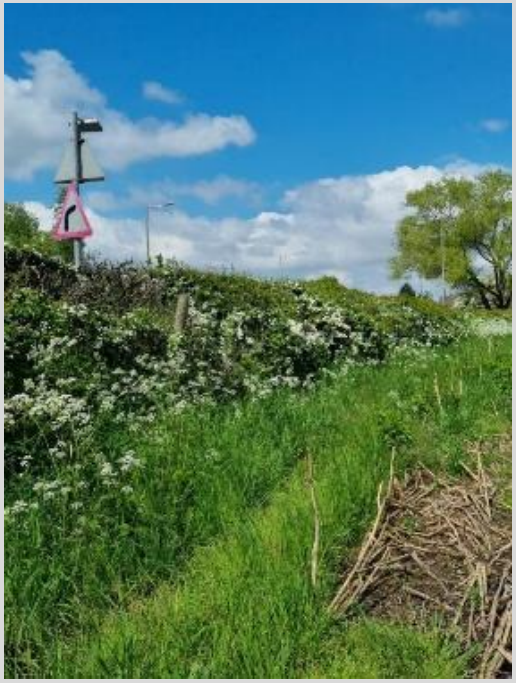

1400 Hedgerow 18B - Not Important

Total Score	2
Average number of species	3
Botanical Samples List **Herb-Robert (Geranium robertianum)**	
Sample 1 **Hawthorn (Crataegus monogyna); Elder (Sambucus nigra)**	
Sample 2 **Ash (Fraxinus excelsior); Maple, field (Acer campestre); Elder (Sambucus nigra); Hawthorn (Crataegus monogyna)**	
Sample 3 **Hawthorn (Crataegus monogyna); Elder (Sambucus nigra); Oak, pedunculate (Quercus robur)**	
Comments: Field margin hedge, separating arable crop field (currently potato) from busy A road. <5 spp and insufficient features, no bridleway.	

1100 Hedgerow 19 - Not Important

Length (m)	58
Width (m)	2
Height (m)	2
Over 30 years old?	Y
Form curtilage of private garden?	N
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N
Wall/bank along at least half its length	N
Average of at least one standard tree per 50m	N
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N
Ditch along at least half of the hedgerow	N
Parallel hedge within 15m of the hedgerow	N
Less than 10% gaps within hedgerow length?	Y
Connections (within 10m) with another hedgerow	2
Connections (within 10m) with a pond	0
Connections (within 10m) with broadleaved woodland	1(score=2)
4+ connection points?	Y

1100 Hedgerow 19 - Not Important

Total Score	2
Average number of species	2
Botanical Samples List	
Sample 1 **Hawthorn (Crataegus monogyna)**	
Comments: Short boundary hedge to arable field (currently fallow). <5 spp and insufficient features, no bridleway.	

1100 Hedgerow 35A - Not Important

Length (m)	200
Width (m)	3
Height (m)	4
Over 30 years old?	Y
Form curtilage of private garden?	N
Run alongside bridleway/footpath/road used as public path/byway open to all traffic?	N
Wall/bank along at least half its length	N
Average of at least one standard tree per 50m	N
3+ woodland ground flora species (listed on Sch. 2 of the Regs) within 1m	N
